

MUTHU KAMATCHI B.E.,

PERSONAL PROFILE

Hello Everyone,

I am recently graduated with a B.E. in Computer Science and Engineering (2023).

I'm proficient in the MERN stack and successfully completed a course in Fullstack Web Development.

I'm eager to find a place where can I learn and grow myself and the organization in parallel

- Higher Secondary
- 67.41%

Grace Mat.Hr.Sec School

- 2015 - 2016
- SSLC
- 81.2%

PROJECTS

- **Detecting Disease in Livestock and Recommending Medicines using Machine Learning**

We developed a machine learning model focused on detecting livestock diseases before they spread.

This innovative solution not only enhances livestock health by preventing diseases but also ensures timely administration of medicines, even in regions with limited access to veterinarians.

- **School's Private Transit Management System**

This project enhances the efficiency of travel services for schools and colleges, making it easier for students.

The project contains a list of private travel services, facilitating seamless transportation for students to their homes and their specific educational institutions.
